Use-Case Name: 3.3 Borrow a book

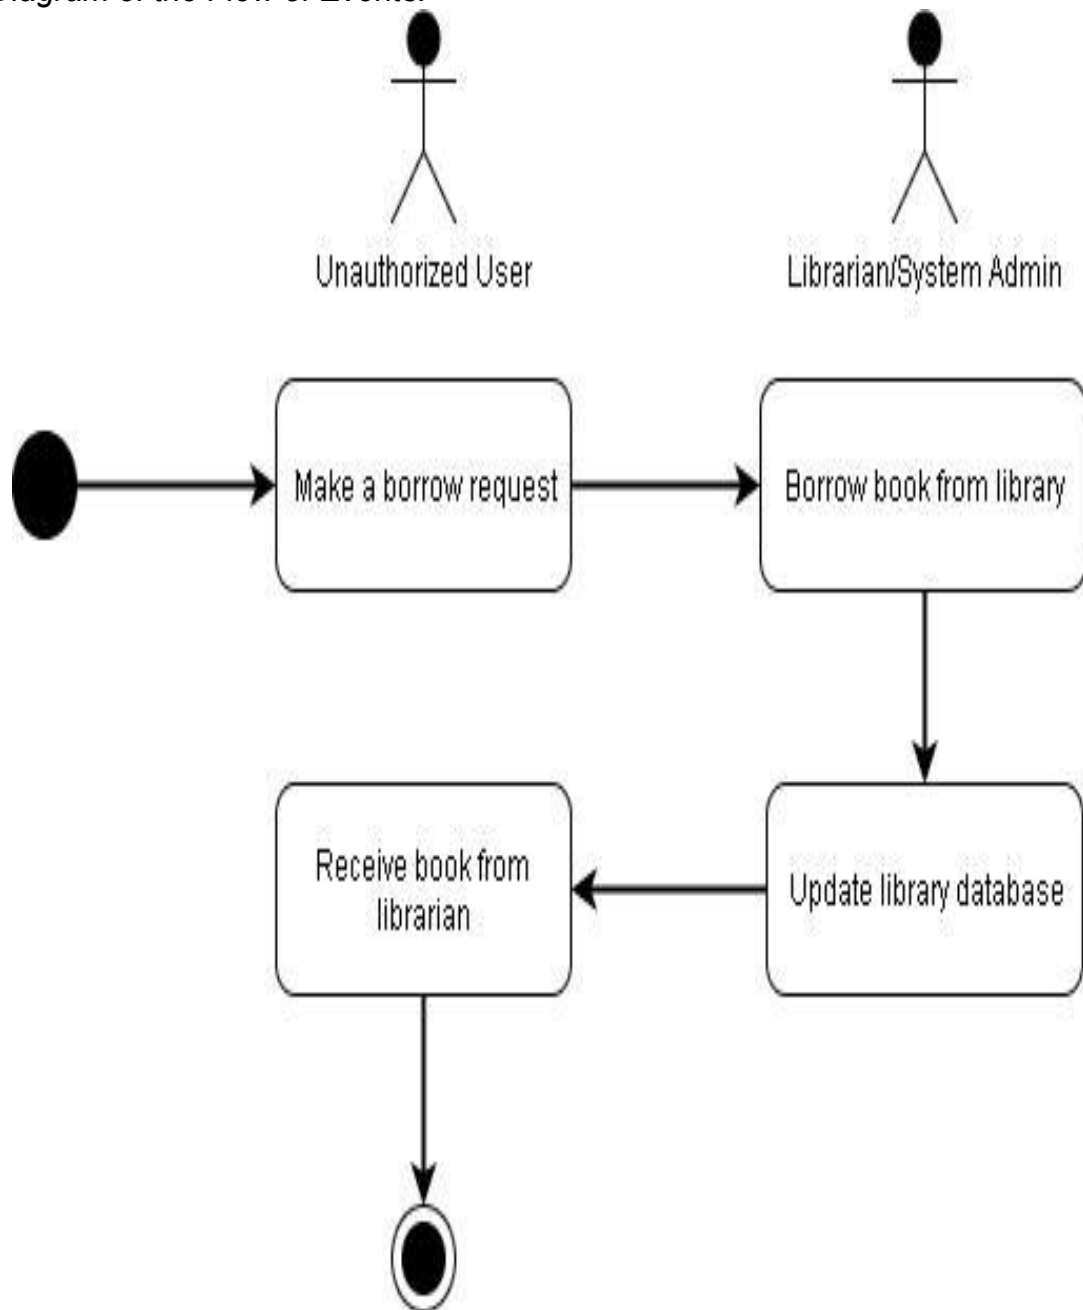

Description: A sub-function of the view book catalog function. This is exclusive to librarians. Once a borrow request is made by a unauthorized user, the librarian borrows the book from the library, making the status of the book borrowed.

Preconditions: Must be logged in and book must be available to be borrowed

Flow of Events:

Scenario Name	Description
Scenario 1 (Basic Flow) Librarian/admin borrows a book	1. Unauthorized user makes a borrow request. 2. Librarian/admin borrows the book from the library 3. Library database is updated by librarian 4. Unauthorized user receives the book

Activity Diagram of the Flow of Events:

Postcondition: NONE

Relationships: NONE

Special Requirements:
NONE
