Use-Case Name: 2.2. Manage profile

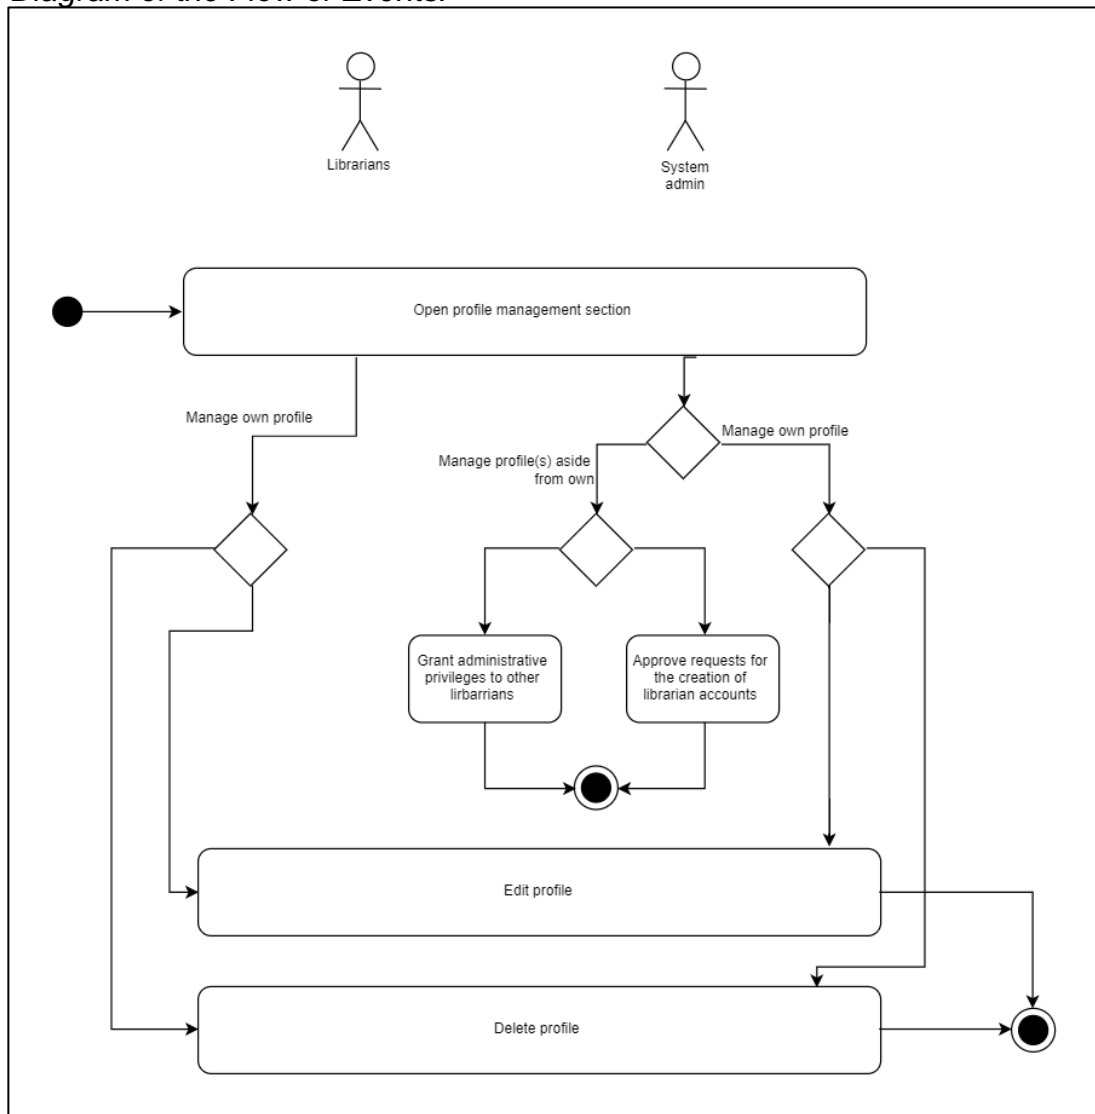

Description: Managing the profiles is a function of librarians (with system admins having more sub-functions). Librarians can edit or delete their profiles.

Preconditions: User must be logged into the system.

Flow of Events:

Scenario Name	Description
Scenario 1 A librarian manages his/her profile	<ol style="list-style-type: none">1. The librarian opens the profile management section.2. He/She is presented his/her profile and has the option to edit profile or delete profile.3. He/She is directed to the appropriate modules to handle the decision.
Scenario 2 A system admin manages profiles	<ol style="list-style-type: none">1. The system admin opens the profile management section.2. He/She can choose to manage his/her own profile or manage others' profiles.3. If he/she chooses to manage his own profile, he has the options to edit or delete the profile.4. He/She is directed to the appropriate modules to handle the decision.5. Else, if the system admin chooses to manage other profiles, he/she can grant the requests for creation of a librarian profile or appoint another librarian as another system admin.6. He/She is directed to the appropriate modules to handle the decision.

Activity Diagram of the Flow of Events:

Postcondition: None

Relationships: None

Special Requirements:
None
