Project LIB OPAC
Use Case Specification

Submitted to:

Asst. Prof. Ma. Rowena C. Solamo
Faculty Member
Department of Computer Science
College of Engineering
University of the Philippines, Diliman

Submitted by:
Francis Zac dela Cruz
Anjelo Jurquina
Nicko Pangarungan

In partial fulfillment of academic requirements
for the course
CS 191 Software Engineering I
of the
1st Semester, AY 2017-2018

Unique Reference:

The documents are stored in this Github repository (https://github.com/cs191-wfu-1718-g3/CS191-project).

[File Reference in GitHub, preferably link.]

Document Purpose:

This document serves to specify properties of the use case in question, such as the flow of events, pre-conditions, post-conditions, etc. (Solamo, 2006)

Target Audience:

System developers, clients, system users

Revision Control

History Revision:

Revision Date	Person Responsible	Version Number	Modification
10/09/2017	Francis Zac dela Cruz	1.0	Initial Document

*Use-Case Name*:   Delete book entry

Description: A sub-function under the book catalog management. This allows the admin to delete an existing entry of a book in the database.

Preconditions: User must be authenticated, and must have administrative privileges.

Flow of Events:

Scenario Name	*Description*
Scenario 1 (Basic Flow) Book is in-shelf	1. Admin selects 1 or more book entries to delete. 2. Admin deletes them. 3. Books are deleted.
Scenario 2 Some books are on-circ (borrowed)	1. Admin selects 1 or more book entries to delete. 2. Admin tries to delete them. 3. Operation is cancelled (since some books are in circulation)

Activity Diagram of the Flow of Events:

Postcondition: Books are deleted or operation cancelled.

Relationships: NONE

Special Requirements:
   User must be authenticated, and must have administrative privileges
