Nicko Pangarungan

In partial fulfillment of academic requirements
for the course
CS 191 Software Engineering I
of the
1st Semester, AY 2017-2018

Unique Reference:

The documents are stored in this Github repository (https://github.com/cs191-wfu-1718-g3/CS191-project).

[File Reference in GitHub, preferably link.]

Document Purpose:

This document serves to specify properties of the use case in question, such as the flow of events, pre-conditions, post-conditions, etc. (Solamo, 2006)

Target Audience:

System developers, clients, system users

Revision Control

History Revision:

Revision Date	Person Responsible	Version Number	Modification
10/09/2017	Nicko Pangarungan	1.0	Initial Document

*Use-Case Name*:   2.2.3 Approve the creation of librarian profiles

Description: A sub-function under profile management. This is exclusive to system admins. Upon the creation of a librarian profile, an admin is notified and he/she is in charge of verifying that the one who made the profile is indeed a librarian. Once verified, the admin gives his approval of the creation of the librarian profile.

Preconditions: User must be logged into the system

Flow of Events:

Scenario Name	Description
Scenario 1 The system admin approves the creation of a librarian profile	1. The system admin is notified and receives the pending (unapproved by other system admins) requests for profile creation. 2. The system admin verifies whether the person who made the request is indeed who he/she claims to be and that he/she is a librarian currently affiliated with the library. 3. Once verified, the system admin approves the creation of the profile and the system is updated. 4. An email notification is sent to the provided email about the approval. 5. The request is marked as resolved.
Scenario 2 The system admin rejects the creation of a librarian profile	1. The system admin is notified and receives the pending (unapproved by other system admins) requests for profile creation. 2. The system admin verifies whether the person who made the request is indeed who he/she claims to be and that he/she is a librarian currently affiliated with the library. 3. Upon the discovery that the person who made the profile is a different person or is not affiliated with the library, the system admin rejects the request. 4. An email notification is sent to the provided email detailing the reasons for denial. 5. The request is marked as resolved.

Activity Diagram of the Flow of Events:

Postcondition: None

Relationships: None
